

Join the Auditor General of South Africa as a Senior Manager: **INVESTIGATIONS DATA ANALYTICS** (Execution)

PURPOSE OF ROLE

In this role, you will support the organisation that was named the Employer of Choice in 2022* in supporting the Investigations Business Unit (IBU) in its integration efforts with the Regularity Audit Business Units (RABUs) towards clean audit outcomes by pro-actively identifying trends, key risks, red flags, suspicious transactions/ trends relating to maladministration, fraud, corruption and non-compliance in the public sector. This will allow the AGSA to use these emerging trends as well as existing gaps in the IBU's data analytics service offering to develop data analytic procedures to support RABU's (ISA240 audit support) in their goal towards clean audit outcomes.

SKILLS AND EXPERIENCE

We are looking for a seasoned professional with a minimum postgraduate qualification - CA (SA) or RGA, CISA or equivalent qualification or ACDA, ACFE/post grad diploma in forensic accounting/ICFP ACL Certified Data Analysis Certification, at least 7 years' experience (post qualification), of which 4 years should have been a data analytics experience within a forensic investigation experience at a management level, expert scripting ability is a requirement including knowledge of data mining principles, predictive analytics and experience using analytical concepts, development and designing tests, analysing data.

*The organisation was named 'Employer of choice for two consecutive years'.

**CLOSING DATE
FOR APPLICATIONS:
31 OCTOBER 2023**
